

New York City Data Center

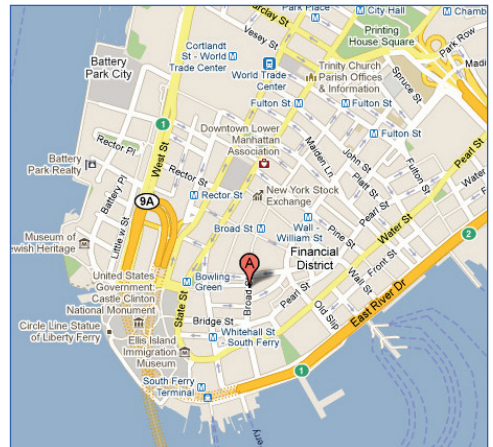

A major connectivity hub within the former International Telephone & Telegraph Building in the center of the Wall Street area, FiberMedia's downtown **New York City** Data Center is perfectly suited for carriers and customers with diverse connectivity requirements, especially financial sector-based firms that require the convenience of a Financial District location.

All FiberMedia Data Centers offer:

- Flexible infrastructure and service options that scale with your business
- Customized managed services with specialization in the finance, healthcare, media, carrier and IT sectors
- A powerful combination of your own data center and our facilities with on-demand technology – unlike any other provider in the industry

Convenience and security in the heart of Wall Street:

- Low-latency geographic proximity to the financial markets, including NYSE and AMEX exchanges
- Colocation customers can choose only what they need from a full menu of managed services
- Part of our network of five data centers throughout the New York Metro area
- SAS70 Type 2 Certification
- Our in-house technical design/build team provides seamless and quick installations

Location:

- In the center of the downtown Financial District
- Just blocks from major subway lines and PATH trains
- Contact FiberMedia for more and address information
