

Cleveland Data Center

Within the premier Carrier Hotel in the heart of downtown **Cleveland**, FiberMedia's data center offers the unlimited power and connectivity expandability that make us the trusted infrastructure support partner of leading companies in financial services, IT, media and healthcare.

All FiberMedia Data Centers offer:

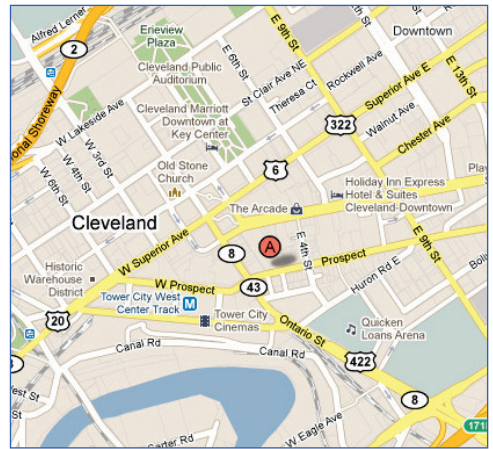

- Flexible infrastructure and service options that scale with your business
- Customized managed services with specialization in the finance, healthcare, media, carrier and IT sectors
- A powerful combination of your own data center and our facilities with on-demand technology – unlike any other provider in the industry

Convenience and security just minutes from NYC:

- Strategically located to provide increased security and enhanced redundancy to our New York region network of data centers

- Colocation customers can choose only what they need from a full menu of managed services
- Part of our network of six data centers throughout the Northeast region
- SAS70 Type 2 Certification
- Our in-house technical design/build team provides seamless and quick installations

Location:

- Directly on the metro-area train system hub, that connects directly to the Cleveland Airport
- Within the Terminal Tower complex at the center of the city
- Contact FiberMedia for tours and address information

Capabilities and service offerings include:

- Colocation facilities, including cabinets, cages & private suites
- Fully redundant 2N power & back-up systems
- Carrier-neutral connectivity from multiple providers
- Cloud platform delivers fully managed infrastructure & storage on-demand (IaaS)
- Network Operations Center (NOC) services
- 24/7 remote hands

- Application support, maintenance & administration
